The Division of Science Resources Statistics (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

August 2005

Information and data from the Division of Science Resources Statistics are available on the Web at <http://www.nsf.gov/statistics/>. This report is available in electronic format only. For NSF's Telephonic Device for the Deaf, dial toll-free (800) 281-8749 or (703) 292-5090.

ACKNOWLEDGMENTS

John E. Jankowski, Program Director, Research and Development Statistics Program, Division of Science Resources Statistics (SRS), managed the preparation of this report. Lynda T. Carlson, Division Director; Mary J. Frase, Deputy Division Director; and Ronald S. Fecso, Chief Mathematical Statistician, SRS, provided additional guidance and review. Tanya R. Gore of the SRS Information and Technology Services Program (ITSP)

composed the report, and Peg Whalen, ITSP, oversaw electronic publication. ORC Macro, Bethesda, MD, under NSF contract number SRS-02-43193, prepared the tables, general and technical notes, and report copy. ORC Macro staff members who worked on this report were Kathryn Gill, Jennifer Greer, Gail H. Henry, Mark Morgan, and Emily Wuerker.

GENERAL NOTES

The data presented in this report were compiled from the National Science Foundation (NSF) fiscal year 2003 Survey of Research and Development Expenditures at Universities and Colleges (academic R&D expenditures survey). They refer to science and engineering expenditures for separately budgeted R&D. Terms used in institutional accounting procedures are incorporated throughout the tables and are defined below.

Separately budgeted R&D expenditures includes all funds expended for activities that are specifically organized to produce research outcomes. These activities are either commissioned by an agency external to the institution or are separately budgeted by an organizational unit within the institution. *Expenditures* are funds actually spent by an institution during its fiscal year. *Separately budgeted R&D equipment purchased from current funds* includes all research equipment purchased under sponsored research project awards.

Federally funded research and development centers (FFRDCs) are R&D-performing organizations that range from traditional contractor-owned/contractor-operated or government-owned/contractor-operated organizational structures to various degrees of contractor/government control and ownership. FFRDCs are formed to achieve particular federal R&D objectives that cannot be met as effectively by existing organizations.

Imputation and imputed data refer to the computerized process by which NSF develops estimates of data when institutions do not furnish information upon request. Estimates are based primarily on key data items

reported in prior-year surveys. When these key data items are not available, estimates are derived from data of respondent institutions that have similar characteristics, including highest degree granted and type of institutional control (public or private). In this publication, the letter "i" is used to identify imputed data. The letter "e" is used when institutional respondents indicated that their data were estimated or when data required slight mathematical adjustments.

Data presented in trend tables are from the most recently completed survey cycle. Prior-year data have been reviewed for consistency with current-year responses and, when necessary, were revised in consultation with institutional respondents. Institutions revise prior years' data when important changes occur in reporting practices and program classifications, and only the latest tables incorporate such changes. To obtain accurate historical data, use only the latest detailed statistical tables for FY 2003 and not data published earlier.

Requests for additional information concerning the survey findings for the current or prior surveys should be directed to

R&D Expenditures, in Descending Order of Amounts, by Institution

26. R&D expenditures at universities and colleges, ranked by FY 2003 R&D expenditures: FY 1996–2003	78
27. Federally financed R&D expenditures at universities and colleges, ranked by FY 2003 expenditures: FY 1996–2003	94
28. Nonfederal R&D expenditures at universities and colleges, ranked by FY 2003 expenditures for the first 200 institutions: FY 1996–2003	110
29. R&D expenditures at universities and colleges, ranked by all R&D expenditures for the first 200 institutions, by source of funds: FY 2003	116
30. R&D expenditures at public universities and colleges, ranked by all R&D expenditures for the first 150 institutions, by source of funds: FY 2003	120
31. R&D expenditures at private universities and colleges, ranked by all R&D expenditures for the first 100 institutions, by source of funds: FY 2003	123
32. Industry-financed R&D expenditures at universities and colleges, ranked by FY 2003 expenditures for the first 200 institutions: FY 1996–2003	126
33. R&D expenditures at universities and colleges, ranked by all R&D expenditures for the first 200 institutions, by science and engineering field: FY 2003	130
34. Federally financed R&D expenditures at universities and colleges, ranked by federal R&D expenditures for the first 200 institutions, by science and engineering field: FY 2003	136

<i>Table</i>	<i>Page</i>
35. Nonfederal R&D expenditures at universities and colleges, ranked by nonfederal R&D expenditures for the first 200 institutions, by science and engineering field: FY 2003	142
36. R&D expenditures at public universities and colleges, ranked by all R&D expenditures for the first 150 institutions, by science and engineering field: FY 2003	148
37. Federally financed R&D expenditures at public universities and colleges, ranked by federal R&D expenditures for the first 100 institutions, by science and engineering field: FY 2003	153
38. R&D expenditures at private universities and colleges, ranked by all R&D expenditures for the first 100 institutions, by science and engineering field: FY 2003	156
39. Federally financed R&D expenditures at private universities and colleges, ranked by federal R&D expenditures for the first 100 institutions, by science and engineering field: FY 2003	159
40. Total and federally financed R&D expenditures at historically black colleges and universities, ranked by FY 2003 total: FY 2000–03	162
 R&D Expenditures, by Science and Engineering Field and Selected Subfields, in Descending Order of Amounts, by Institution	
41. Total and federally financed R&D expenditures in engineering at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	164
42. R&D expenditures in engineering subfields at universities and colleges, ranked by all R&D expenditures in subfields for the first 100 institutions: FY 2003	167
43. Federally financed R&D expenditures in engineering subfields at universities and colleges, ranked by all R&D expenditures in subfields for the first 100 institutions: FY 2003	170
44. R&D expenditures in the physical sciences at universities and colleges, ranked by all FY 2003 physical sciences for the first 100 institutions: FY 2000–03 and by subfield for FY 2003	173
45. Federally financed R&D expenditures in the physical sciences at universities and colleges, ranked by all FY 2003 physical sciences for the first 100 institutions: FY 2000–03 and by subfield for FY 2003	176
46. Total and federally financed R&D expenditures in chemistry at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	179
47. Total and federally financed R&D expenditures in physics at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	182
48. R&D expenditures in the environmental sciences at universities and colleges, ranked by all FY 2003 environmental sciences for the first 100 institutions: FY 2000–03 and by subfield for FY 2003	185
49. Federally financed R&D expenditures in the environmental sciences at universities and colleges, ranked by all environmental sciences for the first 100 institutions: FY 2000–03 and by subfield for FY 2003	188
50. Total and federally financed R&D expenditures in the mathematical sciences at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	191
51. Total and federally financed R&D expenditures in the computer sciences at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	194

<i>Table</i>	<i>Page</i>
52. R&D expenditures in the life sciences at universities and colleges, ranked by all FY 2003 life sciences for the first 150 institutions: FY 2000–03 and by subfield for FY 2003	197
53. Federally financed R&D expenditures in the life sciences at universities and colleges, ranked by all FY 2003 life sciences for the first 150 institutions: FY 2000–03 and by subfield for FY 2003	201
54. Total and federally financed R&D expenditures in the agricultural sciences at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	205
55. Total and federally financed R&D expenditures in the biological sciences at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	208
56. Total and federally financed R&D expenditures in the medical sciences at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	211
57. Total and federally financed R&D expenditures in psychology at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	214
58. R&D expenditures in the social sciences at universities and colleges, ranked by all FY 2003 social sciences for the first 100 institutions: FY 2000–03 and by subfield for FY 2003	217
59. Federally financed R&D expenditures in the social sciences at universities and colleges, ranked by all FY 2003 social sciences for the first 100 institutions: FY 2000–03 and by subfield for FY 2003	220
Current Fund Expenditures for Research Equipment, by Science and Engineering Field and Source of Funds	
60. Current fund expenditures for research equipment at universities and colleges, by science and engineering field and source of funds: FY 2002 and 2003	223
61. Current fund expenditures for research equipment at universities and colleges, by science and engineering field, source of funds, and type of control: FY 2003	224
62. Total and federally financed current fund expenditures for research equipment at universities and colleges, ranked by FY 2003 total for the first 100 institutions: FY 2000–03	225
FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS	
R&D Expenditures at Federally Funded Research and Development Centers	
63. R&D expenditures at university-administered federally funded research and development centers, by character of work: FY 1953–2003	228
64. Total and federally financed R&D expenditures at university-administered federally funded research and development centers, ranked by FY 2003 total: FY 2000–03	230
65. R&D expenditures at all federally funded research and development centers, by source of funds and type of federally funded research and development center: FY 2003	231

2002	36,370	27,280	75.0	9,090	25.0
2003	40,077	29,981	74.8	10,097	25.2

NA = not available.

^a Separate data for basic research and applied R&D were not collected for FY 1978.

NOTES: R&D expenditures by character of work are based on estimates of basic research provided by universities and colleges. Because of rounding, detail may not add to total. The character of work estimation procedure was revised for FY 1998 and later years; hence, these data are not directly comparable with data for 1997 and earlier years.

TABLE 25. R&D expenditures at universities and colleges, by state, control, and science and engineering field: FY 2003
 (Dollars in thousands)

State, control, and institution	All R&D expenditures	Environmental sciences	Life sciences	Math and computer sciences	Physical sciences	Psychology	Social sciences	Sciences, nec	Engineering
Virgin Islands	15,762	1,551	10,222	2,865	793	0	331	0	0
Public	15,762	1,551	10,222	2,865	793	0	331	0	0
U. of the VI	15,762	1,551 i	10,222 i	2,865 i	793 i	0 i	331 i	0 i	0 i

e = estimated.

i = imputed.

nec = not elsewhere classified.

^a The Johns Hopkins University includes the Applied Physics Laboratory, with \$607 million in total R&D expenditures.

NOTE: Because of rounding, detail may not add to total.

APPENDIX A: TECHNICAL NOTES

SCOPE OF THE SURVEY

The FY 2003 Survey of Research and Development Expenditures at Universities and Colleges (academic R&D expenditures survey) was sent to 630 institutions of higher education in the United States, Guam, Puerto Rico, and the U.S. Virgin Islands. These institutions have doctoral programs in science and engineering (S&E), are historically black colleges or universities (HBCUs), or are master's or bachelor's degree-granting institutions that expend at least \$150,000 in separately budgeted R&D in S&E.

The survey population was reviewed before data collection began to ensure that each institutional classification was accurate. Characteristics of the schools were reviewed before and during the course of the survey to determine whether changes had occurred (e.g., highest degree granted; school openings, closings, or mergers).

The survey also collected information on R&D from each of the nation's 36 federally funded research and development centers (FFRDCs). Of these 36 FFRDCs, 16 are administered by academic institutions, 16 are administered by nonprofit organizations, and 4 are administered by industrial organizations.

To qualify for the survey, an FFRDC must be engaged in basic or applied research, development, or management of R&D activities, and the results of these activities must be directly monitored by the federal government (usually a single agency) in a relationship expected to be maintained on a long-term basis. The center must be operated, managed, and administered as an autonomous organization or as an identifiable separate operating unit of its parent institution. Finally, 70 percent or more of the center's financial support must be received from the federal government. Although the same survey form (NSF Form 411) is used to collect data from both academic institutions and FFRDCs, FFRDCs were asked to provide only item 1 data, their R&D expenditures by source of funding. The FFRDC R&D data are included in tables 63–65.

FY 2003 SURVEY FRAME DESIGN

The academic R&D expenditures survey is a census of the full population of eligible academic institutions. Before FY 1998 a census of eligible institutions was conducted about every 5 years; during

intervening years eligible institutions were sampled. Since then, a census has been conducted annually. NSF also conducts a population review each year to ensure that all institutions that meet the inclusion criteria are surveyed. This review is based on the survey frame design developed in FY 1998:

- All S&E doctorate-granting institutions and all HBCUs are surveyed.
- All S&E master's and bachelor's degree-granting institutions that reported at least \$150,000 in separately budgeted R&D expenditures in S&E in the previous fiscal year are surveyed. NSF contacts master's and bachelor's degree-granting institutions that were not in the population of the previous census to determine whether they meet the \$150,000 expenditure criterion. Institutions with a minimum of \$150,000 are added to or retained in the survey population.

In FY 2003 NSF conducted a population review using the criteria listed above. As a result, the overall number of institutions surveyed increased from 661 in FY 2002 to 666 in FY 2003 (table A-1).

SURVEY INSTRUMENT

Most major R&D performing institutions have incorporated the data that are needed to complete this survey into their record-keeping systems, thereby ensuring a consistent format from one year to the next. Such consistency yields the most useful statistics for time series. As a rule, information to complete this survey is found in the institutions' year-end accounting records.

The survey consists of seven main items.

Item 1 is a request that institutions report their total current expenditures for separately budgeted S&E R&D expenditures by source of funds. Schools are also asked to provide the percentage of total expenditures and the percentage of federally financed expenditures that are considered basic research. Also included are research funds for which an outside organization, educational or other, is a subrecipient.

Care should be taken when interpreting data on source of funds. Industry R&D support is limited to grants and contracts for R&D activities from profit-making organi-

zations. Total industry funds excludes research funded through unrestricted accounts and from corporate foundations, endowments, and fellowships to students; those funds would be included in an institution's own funding totals. An increasing number of institutions have links with industry and foundations through subcontracts, thus complicating the identification of funding sources. In addition, institutional policy may determine whether unrestricted state support is reported as state or institutional funding.

Item 1A is a request for total and federally financed current fund expenditures for separately budgeted S&E R&D passed through the institution to subrecipients.

Item 1B is a request for total and federally financed current fund expenditures for separately budgeted S&E R&D received by the institution as a subrecipient.

Item 2 is a request for total and federally financed current fund expenditures for separately budgeted R&D activities by detailed S&E fields. When interpreting these data at the detailed discipline level, users should keep in mind that there is considerable interdisciplinary and multidisciplinary activity.

Item 2A is a request for total and federally financed current fund expenditures for separately budgeted non-S&E R&D activities by detailed non-S&E fields. This item was originally added to the survey as an optional item in FY 1997 and was collected as a core item for the first time in FY 2003.

Table A-15 shows non-S&E R&D expenditures for the 100 institutions reporting the highest amounts. Table A-16 shows federal non-S&E R&D expenditures for the 100 institutions reporting the highest amounts.

Item 2B is a request for federally financed current fund expenditures for separately budgeted R&D activities by S&E field and federal agency. This item was originally added to the survey as an optional item in FY 1998 and was collected as a core item for the first time in FY 2003.

Table A-17 shows federally financed R&D expenditures by S&E field and federal agency for those institutions that responded to this item. Of the 630 universities and colleges surveyed, 516 responded to this question.

Item 3 is a request for the portions of total and federally financed expenditures reported in items 1 and 2 that were used for the purchase of research equipment out of current funds. This portion includes all research equipment purchased under sponsored research project awards and disbursed in the same detailed disciplines as in item 2. These data are of special interest to federal and institutional policymakers in determining current funding levels for scientific research instrumentation.

RESPONSE RATE

The FY 2003 survey questionnaires were sent by e-mail in December 2003. Respondents could choose to submit an Adobe Portable Document Format questionnaire from the Web or use the Web-based data collection system to respond to the survey. Every effort was made to maintain close contact with respondents in order to preserve both consistency and continuity in the resulting data. Questionnaires were carefully examined for completeness upon receipt. Computerized facsimiles of the survey data were then prepared for each institution; these compared the current and 2 prior years of data and noted any substantive disparities. Respondents were sent personalized e-mail messages asking them to provide revisions before the final processing and tabulation of data. The e-mail messages included a link to the academic R&D expenditures survey Web-based data collection system, allowing respondents to view and correct their data via the Web.

Respondents were asked to explain significant discrepancies between current and prior years' reporting patterns previously verified as correct. They were encouraged to correct prior years' data if anomalies were identified. When respondents updated or amended figures from past years, NSF made corresponding changes to trend data in this report and to the underlying microdata database. Similarly, if a respondent institution underwent an organizational change, such as a merger, NSF incorporated the effects of the change into prior years' data.

By the survey's closing date, at the beginning of September 2004, forms had been received from 593 universities and colleges out of the academic population of 630, a response rate of 94.1 percent. Responses were received from 96.5 percent of all doctorate-granting institutions, to which 98.5 percent of the estimated national R&D expenditures in S&E fields had been disbursed. All 36

FFRDCs returned forms. Table A-2 displays a detailed breakdown of response rates by highest degree granted.

NATIONAL TOTAL AND IMPUTATION

Two statistical procedures were used to provide a national estimate for all universities and colleges performing R&D in FY 2003. First, data were estimated by imputation for the 37 institutions that had not responded by the closing date of the survey, using imputation techniques that have been used consistently since FY 1976. Second, data were imputed for universities and colleges that submitted only partial responses. The imputed total was \$159 million, or 0.4 percent of the \$40 billion in all separately budgeted R&D expenditures (table A-3).

Tables A-4 and A-5 present breakdowns of the total and federal imputed amounts by S&E field. The dollar amount imputed is displayed along with the percentage it represents of the national estimate for universities and colleges in a particular field. The amount imputed is similarly broken down by source of funds in table A-6.

A number of surveyed institutions have responded intermittently in past years. For the years in which no response was received, data have been imputed as previously described. Although the imputation algorithm accurately reflects national trends, it cannot account for specific trends at individual institutions. For this reason, a separate estimation of prior-years data was performed, following current-year imputation.

For each institution, formerly imputed key variables for items 1–3 were recomputed to ensure that the imputed data accurately represent the growth patterns shown by reported data. If, for example, data were reported for FY 1996 and FY 2003 but not for the intervening years, the difference between the reported figures for each item total was calculated and evenly distributed across the intervening years (1997–2002). The new figures were spread across disciplines (items 2 and 3) or sources of support (item 1) on the basis of the most recent reporting pattern. Institutions were given an opportunity to review imputed data and provide comments before data were finalized. These procedures result in much more consistent reporting trends for individual institutions but have little effect on aggregate figures reflecting national totals.

CHANGES IN BASIC RESEARCH TOTALS

The Division of Science Resources Statistics (SRS) at NSF regularly reviews the methodologies used in the academic R&D expenditures survey with the goal of producing the most accurate statistics possible for researchers and policymakers. A review of responses to item 1, question 2, was conducted in FY 2001, 2002, and 2003. The reviews determined that the aggregate statistics could be improved by refining the imputation methodology for the item. Some universities and colleges are either unable or unwilling to respond to this question, and values must be imputed for it to present aggregate statistics.

In the past, if a respondent did not reply to the basic research question, the prior year's basic research share (whether reported by or imputed for the respondent) was carried forward. After interviews with respondents revealed that abnormal or erroneous values (such as 0 percent basic research) were sometimes carried forward for several years, a revised imputation methodology was introduced. The revised imputation methodology carries forward the prior year's basic research share only if the respondent reported or estimated that year's data. In all other cases an econometric model is used to impute the amount of total and federal basic research. The model accounts for differences between public and private institutions and nonfederal sources of R&D funding.

ITEM 1A ANALYSIS

Item 1A was completed by 90.9 percent of the respondents from academic institutions. The total R&D expenditures passed through to subrecipients, \$2.4 billion, represents 7.2 percent of item 1A respondents' total R&D expenditures and 6.1 percent of all separately budgeted R&D in FY 2003 (table A-7). Doctorate-granting institutions reported a higher percentage of pass-through funds in item 1A than did nondoctorate-granting institutions, 7.2 percent compared with 5.1 percent (\$25 million) for nondoctorate-granting institutions. Item 1A respondents from private institutions reported a higher percentage of pass-through funds (8.5 percent) than did those from public institutions (6.4 percent).

Academic respondents to item 1A reported \$2.1 billion in federal R&D funds passed through to subrecipients (table A-8). This amount represents 9.9 percent of the

federal support reported by item 1A respondents and 8.5 percent of the \$25 billion in federal support to all respondents.

Table A-9 shows the R&D expenditures passed through to subrecipients for the 100 institutions reporting the highest amounts. Table A-10 shows the federal R&D expenditures passed through to subrecipients for the 100 institutions reporting the highest amounts.

ITEM 1B ANALYSIS

Item 1B was completed by 89.6 percent of the respondents from academic institutions. The total R&D expenditures received as subrecipients, \$2.6 billion, represents 7.9 percent of item 1B respondents' total R&D expenditures and 6.5 percent of all separately budgeted R&D in FY 2003 (table 11). Doctorate-granting institutions reported a lower percentage of funds received as subrecipients in item 1B than did nondoctorate-granting institutions, 7.8 percent (\$2.5 billion) compared with 10.9 percent (\$55 million) for nondoctorate-granting institutions. Item 1B respondents from private institutions reported a slightly higher percentage of funds received as subrecipients (7.9 percent) than did those from public institutions (7.8 percent).

Academic respondents to item 1B reported \$2.3 billion in federal R&D funds received as subrecipients (table 12). This amount represents 11.1 percent of the federal support reported by item 1B respondents and 9.3 percent of the \$25 billion in federal support to all respondents.

Table A-13 shows R&D expenditures received as a subrecipient for the 100 institutions reporting the highest amounts. Table A-14 shows federal R&D expendi-

tures received as a subrecipient for the 100 institutions reporting the highest amounts.

DATA AVAILABILITY

Data from this survey and previous reports are available on the Web at <http://www.nsf.gov/statistics/>.

Selected data items for institutions are available on the Web at <http://www.nsf.gov/statistics/profiles/start.cfm>. The institutional profiles cover data from this survey and data collected in other NSF academic S&E surveys: the Survey of Graduate Students and Postdoctorates in Science and Engineering (graduate student survey) and the Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions (federal S&E support survey). The profiles are also linked to the corresponding ranking table for each survey.

Data for these and other surveys are available through WebCASPAR, a database system designed to provide quick, convenient access to a wide range of statistical data on U.S. universities and colleges and their science and engineering resources. The latest version of WebCASPAR is available on the Web at <http://webcaspar.nsf.gov/>.

WebCASPAR data are drawn from a number of sources. All data are available for individual institutions, by state, and at the national level. Longitudinal data from surveys of universities and colleges conducted by SRS include the academic R&D expenditures survey, graduate student survey, and federal S&E support survey. Data from the National Center for Education Statistics surveys of universities and colleges include earned degrees, opening fall enrollment, tuition, faculty salaries, tenure and fringe benefits, and financial statistics.

A-2. Response rates for the academic R&D expenditures survey, by respondent type and highest degree granted: FY 2003	238
A-3. Imputed amounts for total R&D expenditures at universities and colleges, by highest degree granted: FY 2003	239
A-4. Imputed amounts for total R&D expenditures at universities and colleges, by science and engineering field: FY 2003	240
A-5. Imputed amounts for federally financed R&D expenditures at universities and colleges, by science and engineering field: FY 2003	241
A-6. Imputed amounts for R&D expenditures at universities and colleges, by source of funds: FY 2003	242
A-7. Item 1A summary of total academic R&D expenditures: FY 2003	243
A-8. Item 1A summary of federal academic R&D expenditures: FY 2003	244
A-9. R&D expenditures passed through to subrecipients by universities and colleges, ranked by amount passed through for the first 100 institutions: FY 2003	245
A-10. Federal R&D expenditures passed through to subrecipients by universities and colleges, ranked by amount passed through for the first 100 institutions: FY 2003	248
A-11. Item 1B summary of total academic R&D expenditures: FY 2003	251
A-12. Item 1B summary of federal academic R&D expenditures: FY 2003	252
A-13. R&D expenditures received as a subrecipient by universities and colleges, ranked by amount received for the first 100 institutions: FY 2003	253
A-14. Federal R&D expenditures received as a subrecipient by universities and colleges, ranked by amount received for the first 100 institutions: FY 2003	256
A-15. R&D expenditures in non-science and engineering fields at universities and colleges, ranked by total non-S&E expenditures for the first 100 institutions: FY 2003	259
A-16. Federally financed R&D expenditures in non-science and engineering fields at universities and colleges, ranked by total federal non-S&E expenditures for the first 100 institutions: FY 2003	262
A-17. Federally financed R&D expenditures at universities and colleges, by field of science and federal agency: FY 2003	265

TABLE A-1. Institutions surveyed for the academic R&D expenditures survey, by respondent type and highest degree granted: FY 1998–2003

Respondent type and highest degree granted	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003
All respondents	572	614	639	644	661	666
Universities and colleges	555	597	623	608	625	630
Doctorate	357	359	362	358	361	369
Master's	118	148	162	158	161	159
Bachelor's	80	90	99	92	103	102
All FFRDCs	17	17	16	36	36	36
University-administered FFRDCs	17	17	16	16	16	16
Industry-administered FFRDCs	0	0	0	4	4	4
Nonprofit-administered FFRDCs	0	0	0	16	16	16

FFRDC = federally funded research and development center.

SOURCE: National Science Foundation/Division of Science Resources Statistics, Survey of Research and Development Expenditures at Universities and Colleges, FY 2003.

TABLE A-2. Response rates for the academic R&D expenditures survey, by respondent type and highest degree granted: FY 2003

Respondent type and highest degree granted	Number in survey universe	Number of complete responses	Number of partial responses	Total number of responses	Response rate
All respondents	666	541	88	629	94.4
Universities and colleges	630	505	88	593	94.1
Doctorate	369	309	47	356	96.5
Master's	159	117	27	144	90.6
Bachelor's	102	79	14	93	91.2
All FFRDCs	36	36	0	36	100.0
University-administered FFRDCs	16	16	0	16	100.0
Industry-administered FFRDCs	4	4	0	4	100.0
Nonprofit-administered FFRDCs	16	16	0	16	100.0

FFRDC = federally funded research and development center.

SOURCE: National Science Foundation/Division of Science Resources Statistics, Survey of Research and Development Expenditures at Universities and Colleges, FY 2003.

TABLE A-3. Imputed amounts for total R&D expenditures at universities and colleges, by highest degree granted: FY 2003
(Dollars in millions)

Highest degree granted	All separately budgeted R&D expenditures	Imputed amount	Imputed amount as percent of total
All universities and colleges	40,077	159	0.4
Doctorate-granting institutions	39,477	113	0.3
Non-doctorate-granting institutions	601	46	7.7

NOTE: Because of rounding, detail may not add to total.

SOURCE: National Science Foundation/Division of Science Resources Statistics, Survey of Research and Development Expenditures at Universities and Colleges, FY 2003.

TABLE A-4. Imputed amounts for total R&D expenditures at universities and colleges, by science and

engineering field: FY 2003

(Dollars in millions)

Science and engineering field	All separately budgeted R&D expenditures	Imputed amount	Imputed amount as percent of total
All science and engineering	40,077	159	0.4
Computer sciences	1,304	8	0.6
Environmental sciences	2,188	18	0.8
Atmospheric sciences	396	15	3.8
Earth sciences	724	43	5.9
Oceanography	774	36	4.7
Environmental sciences, nec	294	52	17.7
Life sciences	23,764	160	0.7
Agricultural sciences	2,555	50	2.0
Biological sciences	7,392	63	0.9
Medical sciences	12,787	96	0.8
Life sciences, nec	1,030	17	1.7
Mathematical sciences	429	9	2.1
Physical sciences	3,273	39	1.2
Astronomy	392	1	0.3
Chemistry	1,220	22	1.8
Physics	1,420	21	1.5
Physical sciences, nec	240	9	3.8
Psychology	769	5	0.7

Bioengineering/biomedical engineering	190	14	7.4
Chemical engineering	248	16	6.5
Civil engineering	327	14	4.3
Electrical engineering	925	126	13.6
Mechanical engineering	533	89	16.7
Metallurgical/materials engineering	303	3	1.0
Engineering, nec	776	134	17.3

nec = not elsewhere classified.

NOTES: The imputation rate at the total level is lower than the imputation rates at the science and engineering field levels because many institutions could provide totals but not the science and engineering field details. Because of rounding, detail may not add to total.

SOURCE: National Science Foundation/Division of Science Resources Statistics, Survey of Research and Development Expenditures at Universities and Colleges, FY 2003.

TABLE A-6. Imputed amounts for R&D expenditures at universities and colleges, by source of funds: FY 2003
 (Dollars in millions)

Source of funds	All separately budgeted R&D expenditures	Imputed amount	Imputed amount as percent of total
All sources	40,077	159	0.4
Federal government	24,734	85	0.3
State and local government	2,653	16	0.6
Industry	2,162	21	1.0
Institutional funds	7,683	26	0.3
All other sources	2,845	27	0.9

NOTES: Because of rounding, detail may not add to total. Because some institutions reported total R&D expenditures but not individual sources, the sum of imputed sources is greater than the imputed amount for all sources.

SOURCE: National Science Foundation/Division of Science Resources Statistics, Survey of Research and Development Expenditures at Universities and Colleges, FY 2003.

TABLE A-7. Item 1A summary of total academic R&D expenditures: FY 2003
(Dollars in thousands)

Highest degree and control	All respondents' total R&D ^a	Item 1A respondents' total R&D ^b	R&D expenditures passed through to subrecipients		
			Total ^c	Educational subrecipients	Other subrecipients
All academic institutions	39,918,745	33,810,976	2,427,685	1,126,739	761,983
Doctorate	39,363,777	33,309,847	2,402,345	1,111,917	751,465
Nondoctorate	554,968	501,129	25,340	14,822	10,518
Public	27,269,171	21,367,528	1,376,165	680,618	479,053
Private	12,649,574	12,443,448	1,051,520	446,121	282,930

^a Total is amount prior to imputation for nonrespondents.

^b Item 1A measures amount of R&D expenditures passed through institution to subrecipients.

^c Detail may not add to total because of rounding and because some institutions provided only total and federal R&D expenditure data passed through to subrecipients.

SOURCE: National Science Foundation/Division of Science Resources Statistics, Survey of Research and Development Expenditures at Universities and Colleges, FY 2003.

TABLE A-8. Item 1A summary of federal academic R&D expenditures: FY 2003
(Dollars in thousands)

TABLE A-10. Federal R&D expenditures passed through to subrecipients by universities and colleges, ranked by amount passed through for the first 100 institutions: FY 2003
(Dollars in thousands)

Institutions ranked by amount of federal R&D expenditures passed through	Federal R&D expenditures	Federal R&D expenditures passed through to subrecipients		
		Total	Educational subrecipients	Other subrecipients
100 U. DE	69,493	5,961	3,869	2,092
All other sampled institutions	7,298,427	278,021	179,906	92,364

NA = not available.

^a The Johns Hopkins University includes the Applied Physics Laboratory.

NOTES: Detail may not add to total because of rounding and because some respondents reporting federal R&D funds passed through did not break out these funds by type of subrecipient (educational or other). Tied institutions are ranked alphabetically.

SOURCE: National Science Foundation/Division of Science Resources Statistics, Survey of Research and Development Expenditures at Universities and Colleges, FY 2003.

TABLE A-11. Item 1B summary of total academic R&D expenditures: FY 2003
(Dollars in thousands)

Highest degree and control	All respondents' total R&D ^a	Item 1B respondents' total R&D ^b	R&D expenditures received as a subrecipient		
			Total ^c	Higher education pass-through entities	Other pass-through entities
All academic institutions	39,918,745	32,974,984	2,589,400	1,135,390	1,063,611
Doctorate	39,363,777	32,470,188	2,534,338	1,113,239	1,038,230
Nondoctorate	554,968	504,796	55,062	22,151	25,381
Public	27,269,171	21,157,837	1,656,224	750,544	727,601
Private	12,649,574	11,817,147	933,176	384,846	336,010

^a Total is amount prior to imputation for nonrespondents.

^b Item 1B measures amount of R&D expenditures received as a subrecipient.

^c Detail may not add to total because of rounding and because some institutions provided only total and federal R&D expenditure data received as a subrecipient.

APPENDIX B: FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS: FY 2003

DEPARTMENT OF DEFENSE

Administered by universities and colleges

- Lincoln Laboratory
(Massachusetts Institute of Technology)
- Software Engineering Institute
(Carnegie Mellon University)

Administered by other nonprofit organizations

- Aerospace FFRDC
(The Aerospace Corporation)
- Arroyo Center
(RAND Corporation)
- C3I FFRDC
(MITRE Corporation)
- Center for Naval Analyses
(The CNA Corporation)
- Institute for Defense Analyses Communications and Computing FFRDC
(Institute for Defense Analyses)
- Institute for Defense Analyses Studies and Analyses FFRDC
(Institute for Defense Analyses)
- National Defense Research Institute
(RAND Corporation)
- Project Air Force
(RAND Corporation)

DEPARTMENT OF ENERGY

Administered by universities and colleges

- Ames Laboratory
(Iowa State University of Science and Technology)
- Argonne National Laboratory
(University of Chicago and Argonne Universities Association)
- Ernest Orlando Lawrence Berkeley National Laboratory
(University of California)
- Fermi National Accelerator Laboratory
(Universities Research Association, Inc.)
- Lawrence Livermore National Laboratory
(University of California)
- Los Alamos National Laboratory
(University of California)
- Princeton Plasma Physics Laboratory
(Princeton University)
- Stanford Linear Accelerator Center
(Stanford University)
- Thomas Jefferson National Accelerator Facility
(Southeastern Universities Research Association)

Administered by industrial firms

- Idaho National Engineering and Environmental Laboratory
(Bechtel BWXT Idaho, LLC)
- Sandia National Laboratories
(Sandia Corporation, a subsidiary of Lockheed Martin Corporation)
- Savannah River Technology Center
(Westinghouse Savannah River Company)

Administered by other nonprofit organizations

- Brookhaven National Laboratory
(Brookhaven Science Associates, Inc.)
- National Renewable Energy Laboratory
(Midwest Research Institute)
- Oak Ridge National Laboratory
(UT-Battelle, LLC)
- Pacific Northwest National Laboratory
(Battelle Memorial Institute)

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administered by industrial firms

- National Cancer Institute at Frederick
(Science Applications International Corporation)

DEPARTMENT OF TRANSPORTATION

Administered by other nonprofit institutions

- Center for Advanced Aviation System Development
(MITRE Corporation)

DEPARTMENT OF THE TREASURY

Administered by other nonprofit institutions

- Internal Revenue Service FFRDC
(MITRE Corporation)

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Administered by universities and colleges

- Jet Propulsion Laboratory
(California Institute of Technology)

NATIONAL SCIENCE FOUNDATION

Administered by universities and colleges

- National Astronomy and Ionosphere Center
(Cornell University)
- National Center for Atmospheric Research
(University Corporation for Atmospheric Research)
- National Optical Astronomy Observatories
(Association of Universities for Research in Astronomy, Inc.)
- National Radio Astronomy Observatory
(Associated Universities, Inc.)

Administered by other nonprofit institutions

- The Science and Technology Policy Institute
(RAND Corporation)

NUCLEAR REGULATORY COMMISSION

Administered by other nonprofit institutions

- Center for Nuclear Waste Regulatory Analyses
(Southwest Research Institute)

APPENDIX C: SURVEY INSTRUMENTS

Universities and Colleges Survey Instrument

Federally Funded Research and Development Centers Survey Instrument

NATIONAL SCIENCE FOUNDATION
ARLINGTON, VA 22230

FORM APPROVED
OMB No. 3145-0100
Expiration Date: 08/31/06

SURVEY OF RESEARCH AND DEVELOPMENT EXPENDITURES AT UNIVERSITIES AND COLLEGES, FY 2003

Please submit your survey data by January 28, 2004.

Please note that Items 2A and 2B are now part of the full survey.

The Web address for submitting your data:

<http://www.qrc.com/expweb>

Or, mail this form to:

ORC Macro
7315 Wisconsin Avenue, Suite 400W
Bethesda, MD 20814-3202

Or, e-mail your response to:

expweb@qrc.com

The Web password and user ID were e-mailed to each institution. If you have questions about this or any other issue, please call: Marge Machen of NSF at (703) 292-7786, or the Help Line at ORC Macro, 1-866-349-8626.

Your cooperation in returning the survey questionnaire promptly is very important. This information is solicited under the authority of the National Science Foundation Act of 1950, as amended. Your response is entirely voluntary; your failure to provide some or all of the information will in no way adversely affect your institution.

Report data for your institution's 2003 fiscal year. All financial data should be reported in thousands of dollars; for example, an expenditure of \$25,342 should be rounded to the nearest thousand dollars and reported as \$25.

Where exact data are not available, estimates are acceptable. Your estimates will be better than ours.

Include data for branches and all organizational units of your institution, such as medical schools and agricultural experiment stations. Data on research centers and facilities administered by your institution should be included. In addition, include hospitals or clinics owned, operated, or controlled by universities, and integrated operationally with the clinical programs of your medical schools.

NOTE: Academic institutions should exclude data for federally funded research and development centers (FFRDCs). Data for these facilities are collected separately.

It is estimated that response to this survey will require 22 hours. If you wish to comment on this burden, please contact Suzanne H. Plimpton of NSF at (703) 292-7556, or e-mail splimpto@nsf.gov.

Please circle the month in which your institution's fiscal year begins:

Jan Feb Mar Apr May Jun Jul Aug Sept Oct Nov Dec

Instructions for Items 1 and 2

Separately budgeted research and development (R&D) includes all funds expended for activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit within the institution. *Include* research equipment purchased under research project awards from “current fund” accounts. Also *include* research funds for which an outside organization, educational or other, is a subrecipient. *Exclude* training grants, public service grants, demonstration projects, clinical trials, and departmental research expenditures that are not separately budgeted. Also, *exclude* any R&D expenditures in the fields of education, law, humanities, music, the arts, physical education, library science, and all other non-science fields. Allocate funding to the original sources whenever possible, as specified below. If this information is unknown, report the proximate funding source.

Total

- a. *Federal Government.* Report awards for R&D (including direct and reimbursed indirect costs) by all agencies of the Federal Government.
- b. *State and local governments.* Include funds for R&D (including direct and reimbursed indirect costs) from State, county, municipal, or other local governments and their agencies. Include here State funds that support R&D at agricultural and other experiment stations.
- c. *Industry.* Include all awards for R&D (including direct and reimbursed indirect costs) from profit-making organizations, whether engaged in production, distribution, research, service, or other activities. Do not include awards from nonprofit foundations financed by industry; these should be included under “All other sources.”
- d. *Institution funds.* Report funds, *including* related indirect costs, that your institution spent for R&D activities from the following unrestricted sources: general-purpose State or local government appropriations; general-purpose awards from industry, foundations, or other outside sources; tuition and fees; endowment income; gifts; and other institutional funds. In addition, estimate your institution’s on-campus and off-campus unreimbursed indirect costs associated with externally funded R&D projects, including mandatory and voluntary cost sharing. To estimate unreimbursed indirect costs, preferably on a project-by-project basis, use your appropriate on-campus or off-campus *negotiated research indirect cost rate(s)* multiplied by the corresponding base(s) minus actual indirect cost recovery.
- e. *All other sources.* Include awards for R&D (including direct and reimbursed indirect costs) from nonprofit foundations and voluntary health agencies as well as from all other sources not elsewhere classified. Also include gifts from individuals that are restricted by the donor to research. Funds from foundations that are affiliated with, or granted solely to your institution, should be included under “Institution funds.” Funds for R&D received from a health agency that is a unit of a State or local government should be included under “State and local governments.”

Instructions for Items 1A and 1B

For Federal awards, **subrecipient** means the entity that expends Federal awards received from a pass-through entity to carry out a Federal program, but does not include an individual that is a beneficiary of such a program. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency.

–OMB Circular A-133, Section .105 (revised June 27, 2003) For awards from non-Federal sources, the subrecipient definition is analogous to the Federal one.

Higher Education [subrecipients] refers to all academic colleges and universities and all units owned, operated, and controlled by such institutions.

Item 1. How much of your current fund expenditures for separately budgeted research and development in the sciences and engineering (including indirect costs) came from the following sources in FY 2003?

Source of Funds	Line No.	(1) Total (Dollars in thousands)	(2) What Percentage of Federal & Total Funds Are Basic Research
a. Federal Government	1110	\$ _____	% _____
b. State and local governments	1125		
c. Industry	1150		
d. Institution funds (sum of lines 1161 and 1162)	1160		
(1) Institutionally financed organized research	1161		
(2) Unreimbursed indirect costs and related sponsored research	1162		
e. All other sources	1175		
f. TOTAL (sum of a through e)	1100	\$ _____	% _____

BASIC RESEARCH
Please provide the percentages of Federal and total expenditures that are basic research (not applied research) as defined in column (2).

CONFIDENTIALITY
Information received from individual institutions in lines 1161 and 1162, or estimates for basic research expenditures, will NOT be published or released; only aggregate totals will appear in tabulations.

Item 1A. How much of your total (item 1, line f) and Federal (item 1, line a) R&D expenditures were passed through by your institution to subrecipients? (If all information is not available, report those amounts that are available. Exclude vendor relationships.)

Subrecipients	Line No.	(Dollars in thousands)	
		(1) Total	(2) Federal
To higher education subrecipients	1910		
To other subrecipients	1920		
To all subrecipients	1900	\$ _____	\$ _____

Item 1B. How much of your total (item 1, line f) and Federal (item 1, line a) R&D expenditures did your institution receive as a subrecipient? (If all information is not available, report those amounts that are available. Exclude vendor relationships.)

Your Institution as a Subrecipient	Line No.	(Dollars in thousands)	
		(1) Total	(2) Federal
From higher education pass-through entities	1610		
From other pass-through entities	1620		
From all pass-through entities	1600	\$ _____	\$ _____

Item 2. Allocate your FY 2003 current fund expenditures (total and federally financed) for separately budgeted research and development (including indirect costs) by field of science and engineering

Please note that total R&D expenditures in line j, column (1) should be the same as reported in Item 1, line f.

Total Federal R&D expenditures in line j, column (2) should be the same as reported in Item 1, line a.

Please see pages 8 and 9 for the NSF/NCES Crosswalk of Discipline Codes.

Field of Science and Engineering	Line No.	(Dollars in thousands)	
		(1) Total	(2) Federal
a. Engineering (Total)	1410	\$	\$
(1) Aeronautical & astronautical	1411		
(2) Bioengineering/biomedical engineering	1418		
(3) Chemical	1412		
(4) Civil	1413

(1) Economics	1471		
(2) Political science	1472		
(3) Sociology	1473		
(4) Other	1474		
i. Other Sciences, not elsewhere classified (Total)	1480		
j. Total (sum of a through i)	1400	\$	\$

Please EXCLUDE from your response any R&D expenditures in the fields of education, law, humanities, music, the arts, physical education, library science, and all other non-science and engineering fields.

Item 3. Allocate the portion of your FY 2003 current fund expenditures (total and federally financed) for separately budgeted research and development that went for the purchase of research equipment by field of science and engineering

Please report that portion of current fund expenditures reported in items 1 and 2 that went for the purchase of research equipment. This includes all research equipment purchased under sponsored research project awards from current fund accounts.

For column (1), report current fund expenditures for R&D from all sources: Federal Government, State, county, municipal or other governments and their agencies (including State funds supporting R&D at agricultural experiment stations); industry; institution funds; and private foundations and voluntary health agencies, individuals, and associations.

For column (2), include funds from awards for R&D sponsored by agencies of the Federal Government.

Please see pages 8 and 9 for the NSF/NCES Crosswalk of Discipline Codes.

Field of Science and Engineering	Line No.	(Dollars in thousands)	
		(1) Total	(2) Federal
a. Engineering (Total)	1810	\$	\$
(1) Aeronautical & astronautical	1811		
(2) Bioengineering/biomedical engineering	1818		
(3) Chemical	1812

g. Psychology (Total)	1860		
h. Social Sciences (Total)	1870		
(1) Economics	1871		
(2) Political science	1872		
(3) Sociology	1873		
(4) Other	1874		
i. Other Sciences, not elsewhere classified (Total)	1880		
j. Total (sum of a through i)	1800	\$	\$

Current fund expenditures in each field for scientific research equipment is that PORTION or SUBTOTAL of the amounts reported in the corresponding cells of the "Total" and "Federal" columns in Item 2.

Item 2A. What were your current fund expenditures (total and federally financed) for separately budgeted research and development (including indirect costs) for non-science and engineering fields in FY 2003?

NOTE: For rows 2A(a) through 2A(i), report only data that have not been reported in Items 1 and 2 on this survey.
 Non-S&E R&D should **include** any separately budgeted scholarly and creative activity, but should **exclude** training.

Non-science & Engineering Fields	Line No.	(Dollars in thousands)	
		(1) Total	(2) Federal
a. Education	1510	\$	\$
b. Law	1520		
c. Humanities	1530		
d. Visual & Performing Arts	1540		
e. Business and Management	1550		
f. Communications, Journalism, and Library Science	1560		
g. Social Work	1570		
h. Other Non-S&E Fields (please specify)	1580		
i. Total, Non-S&E Fields (sum of a through h)	1500		
j. Total, S&E (from Item 2, line j)	1400		
k. Grand Total (sum of i and j)	2000	\$	\$

NOTE: If you cannot provide expenditures by non-S&E fields, please provide the Total (column 1, line i) and Federal Total (column 2, line i).

CROSSWALK BETWEEN NSF NON-SCIENCE & ENGINEERING FIELDS AND THE NATIONAL CENTER FOR EDUCATION STATISTICS (NCES) CLASSIFICATION OF INSTRUCTIONAL PROGRAMS (CIP)

i. OTHER SCIENCES, n.e.c.	(used when the multidisciplinary and interdisciplinary aspects make the classification under one primary field impossible)				

¹ Institutions with schools of veterinary medicine should distribute R&D expenditures among the appropriate disciplines (agricultural, biological, and medical) rather than only in medical sciences.

Questions and Answers

This document answers common questions about the academic R&D expenditures survey.

DATA USES AND AVAILABILITY

How are these data typically used?

Congress has directed NSF to provide “a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government....” As part of its response, the Division of Science Resources Statistics (SRS) conducts annual surveys of the research and development (R&D) expenditures at the Nation’s universities and colleges.

Congress and Federal and State government planners use the data for science policy analysis, national and international studies, legislative hearing reports, budget formulation sessions, and other measurements of the adequacy of the Nation’s research base. Academic institutions use the information for policy analysis, publicity, and other purposes. Industrial firms often request data to prepare for on-campus recruiting. The data often appear in higher education studies and publications.

How are the data made available?

NSF’s annual *Academic Research and Development Expenditures Survey* compiles detailed data in a comprehensive document, available on request. Institutional profiles show trend data for responses at the institutional level from all academic science and engineering (S&E) surveys.

Survey data are now available on the Web. To obtain the most recent survey publications and data tables, data files, institutional profiles, and access to WebCASPAR, the Web-based Computer-Aided Science Policy Analysis and Research database system, direct your browser to <http://www.nsf.gov/sbe/srs/stats.htm>.

FIELD OF SCIENCE CLASSIFICATIONS

How should I assign field classifications for R&D performed in multidisciplinary centers?

Multidisciplinary research should be categorized by individual research project according to the nature of the research performed. When individual projects encompass multiple fields of S&E, prorate expenditures to report the proportions of each discipline involved. Do not lump funds together into “other” field categories unless the type of research is actually defined as “other.” NSF recommends crediting such research to the appropriate S&E discipline when the project first begins.

How should I allocate research dollars spent for computing or supercomputing services?

Report research dollars spent for computer usage to the individual fields of science and engineering for which the R&D is performed. Do not report these funds in computer science, unless computer science research was performed.

What fields should be excluded from the science and engineering totals?

Exclude fields that are considered to be non-science—education, law, humanities, business, music, the arts, library science, and physical education. Note that you would report separately budgeted R&D for the philosophy of science (a science category), but not philosophy (one of the humanities). The NSF/NCES Crosswalk included with the questionnaire lists all S&E fields.

BASIC RESEARCH

How should basic research be calculated?

The percentage of basic research should be defined at the individual grant level by each principal researcher. Where this is not possible, grants should be reviewed by each department head or other relevant research coordinator.

Here is another method used by one institution to estimate the amounts of basic and applied research: All federally funded grants and R&D funded from other universities, foundations, and nonprofit organizations are considered to be basic research. R&D funds received through Federal cooperative agreements and Federal contracts, all State-funded R&D (except that from the State’s Advanced Research Program), and R&D funds received from private for-profit institutions are considered to be applied research.

SOURCES OF FUNDING

Should faculty practice plan income be included in the survey?

Expenditures for faculty practice plans are not considered research and should not be included. If income from such plans is used to fund other research and the funds are separately budgeted, then the expenditures should be included in institutional funds.

How much of our administrative costs can be reported in the survey?

Administrative salaries and other administrative costs, particularly at your organized research units, can be reported only if funded through projects specifically restricted and budgeted for research. General administrative costs should not be reported.

How should I report institutional funds?

All research dollars reported for your institution should be funds that are separately budgeted and restricted for research, such as sponsored research accounts or general accounts that are specifically budgeted for research. Do not include funds not specifically budgeted for research.

If your institution does not track underrecovery of indirect costs, use the underrecovery formula included in the questionnaire instructions. Do not forget to include and distribute unreimbursed indirect costs by detailed field in survey Item 2.

Be sure to report all indirect costs related to your institutional funds.

Can I report donated research equipment in the survey?

Since donated research equipment is not typically captured in university accounting systems, the value of donated research equipment should not be reported.

COLLABORATIVE RESEARCH ARRANGEMENTS

Should I report expenditures received through collaborative research ventures with other institutions?

Report only what your institution actually expends and accounts for when participating in joint research ventures.

How do I distinguish between being a subrecipient of pass-through funds and being a subcontractor of R&D services?

For Federal awards, a subrecipient is an entity that receives Federal financial assistance from the State or any other entity to administer a program (OMB Circular A-110). The subrecipient actually administers or controls the program, as opposed to the subcontractor who contracts for a specific service on a per-unit basis. A key factor in determining if a subrecipient arrangement exists is determining if the entity assumes the responsibility to administer the program. Subrecipients tend to be the co-authors of publications, writers of technical reports discussing findings, inventors, etc. Unlike a subrecipient relationship, a subcontract is a procurement of goods and/or services. Payments to subcontractors are expenditures for services, not expenditures for research, and are different from pass-through funds to subrecipients.

ORGANIZATIONAL UNITS

Which organizational units should I include in the survey?

Include research conducted through units that are considered part of your institution's organizational structure. For example, report expenditures from branch campuses, medical schools, agricultural stations, research centers and institutes, and any other units whose expenditures are separately budgeted **and are accounted for by your institution's financial system**. Exclude R&D expenditures performed by federally funded research and development centers (FFRDCs), nonprofit institutions, and private laboratories. Do not report salaries of faculty doing research at outside institutions unless your institution accounts for the funding of that research.

For more information, contact Marge Machen at (703) 292-7786 (e-mail: mmachen@nsf.gov).

Academic R&D Expenditures On The Web!

Security: Your data are password-protected to ensure confidentiality.

- Data reporting is easier—enter your data directly onto your computer screen.
- Help and instructions are readily available to you on each Web survey page.
- Data errors are reported to you instantly.

Everything's done on your computer screen. Totals are computed for you. Flags indicate when your survey is ready to submit to NSF.

How It Works

On your computer, open your Web browser (such as Netscape Navigator or Microsoft Internet Explorer) and visit <http://www.qrc.com/expweb>.

Log in by entering the Institution ID and password you received from NSF. (If you forget them, e-mail us at expweb@qrc.com.)

Then you can . . .

- update your contact information
- enter survey data

You Can Also

- print the finished survey on paper for your records
- work offline using spreadsheets and data files
- get personalized help on your computer screen

For Further Information

If you have any questions about this Web survey, please contact ORC Macro by telephone at 1-866-349-8626 or by e-mail at expweb@qrc.com. For any other survey data questions, please contact Marge Machen of NSF at (703) 292-7786 or by e-mail at mmachen@nsf.gov.

The screenshots show the following pages:

- Expenditures by Source of Funds:** A table showing data for Item 1, Current Fund Expenditures for Separately Budgeted Research and Development in the Sciences and Engineering by Source of Funds (include indirect costs). The table includes columns for Source of Funds, Line, Total, Percentage of Funds that are Basic Research (%), and Calculated Amount (\$). Categories include Federal government, State and local governments, Industry, Institution funds (sum of lines 1101 and 1102), Institutionalized organized research, Unreimbursed indirect costs and related sponsored research, and All other sources. A total row shows 1100.
- Your Main Menu:** A menu with options like Contact Information, Hospital Expenditures, Item 1 Expenditures by Source of Funds, Item 1a Passed Through Funds, Item 1b Funds Received as a Subrecipient, Item 2 Expenditures by Field of Science & Engineering, Item 2a Non-Science Expenditures, Item 2b Expenditures for Specific Federal Agencies, and Item 3 Expenditures for Research Equipment.
- Welcome to . . .** A welcome message for the Web system for the NSF Survey of Research and Development Expenditures at Universities and Colleges (academic R&D expenditures). It explains the purpose of the system and how it helps institutions provide data to the National Science Foundation (NSF).
- Login:** A login form with fields for Institution ID Number and Password, and a Login button.

More Features:

- You can review and revise your data at any time.
- The data are reviewed for errors every time you click on **Save**.
- Data are saved to a central database, accessible to you at your convenience.
- After you complete all survey questions, make the data available to NSF by the simple click of a button.

NATIONAL SCIENCE FOUNDATION
ARLINGTON, VA 22230

FORM APPROVED
OMB No. 3145-0100
Expiration Date: 08/31/06

SURVEY OF RESEARCH AND DEVELOPMENT EXPENDITURES FY 2003

Please submit your survey data by January 28, 2004.

The Web address for submitting your data:

<http://www.qrc.com/expweb>

Or, mail this form to:

ORC Macro
7315 Wisconsin Avenue, Suite 400W
Bethesda, MD 20814-3202

Or, e-mail your response to:

expweb@qrc.com

The Web password and user ID were e-mailed each institution. If you have any questions about this or any other issue, please call: Marge Machen of NSF at (703) 292-7786, or call the Help Line at ORC Macro, 1-866-349-8626.

Your cooperation in returning the survey questionnaire promptly is very important. This information is solicited under the authority of the National Science Foundation Act of 1950, as amended. Your response is entirely voluntary; your failure to provide some or all of the information will in no way adversely affect your institution.

All financial data requested on this form should be reported in thousands of dollars; for example, an expenditure of \$25,342 should be rounded to the nearest thousand dollars and reported as \$25.

Where exact data are not available, estimates are acceptable. Your estimates will be better than ours.

It is estimated that response to this survey will require 4 hours. If you wish to comment on this burden, please contact Suzanne H. Plimpton of NSF at (703) 292-7556, or e-mail splimpto@nsf.gov.

Scope:

This survey contains one question which requests data on *current fund expenditures* by source of funds for separately budgeted research and development (R&D). Definitions used are compatible with OMB Circular A-21, revised August 8, 2000.

Definitions:

Research and Development (R&D). R&D for purposes of this survey is the same as "organized research" as defined in Section B.1.b. of OMB Circular A-21 (revised). It includes all R&D activities that are separately budgeted and accounted for.

Research is systematic study directed toward fuller knowledge or understanding of the subject studied. Research is classified as either basic or applied, according to the objectives of the investigator.

Development is systematic use of the knowledge or understanding gained from research, directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes.

Current fund expenditures. These are expenditures of funds available for current operations. Such expenditures include all unrestricted gifts and restricted current funds to the extent that such funds were expended for current operating purposes.

Please circle the month in which your institution's fiscal year begins:

Jan Feb Mar Apr May Jun Jul Aug Sept Oct Nov Dec

Instructions

Separately budgeted research and development (R&D) includes all funds expended for activities specifically organized to produce research outcomes and commissioned by an agency either external to the institution or separately budgeted by an organizational unit within the institution. *Include* research equipment purchased under research project awards from "current fund" accounts. Also *include* research funds for which an outside organization is a subrecipient. *Exclude* training grants, public service grants, demonstration projects, clinical trials, and research expenditures that are not separately budgeted. Allocate funding to the original sources whenever possible, as specified below. If this information is unknown, report the proximate funding source.

Total

- a. *Federal Government.* Report awards for R&D (including direct and reimbursed indirect costs) by all agencies of the Federal Government.
- b. *State and local governments.* Include funds for R&D (including direct and reimbursed indirect costs) from State, county, municipal, or other local governments and their agencies.
- c. *Industry.* Include all awards for R&D (including direct and reimbursed indirect costs) from profit-making organizations, whether engaged in production, distribution, research, service, or other activities. Do not include awards from nonprofit foundations financed by industry; these should be included under "All other sources."
- d. *Institution funds.* Report funds, *including* related indirect costs, that your institution spent for R&D activities from the following unrestricted sources: general-purpose awards from industry, foundations, or other outside sources, and other institutional funds. In addition, estimate your institution's unreimbursed indirect costs associated with externally funded R&D projects, including mandatory and voluntary cost sharing. To estimate unreimbursed indirect costs, preferably on a project-by-project basis, use your appropriate *negotiated research indirect cost rate(s)* multiplied by the corresponding base(s) minus actual indirect cost recovery.
- e. *All other sources.* Include awards for R&D (including direct and reimbursed indirect costs) from nonprofit foundations and voluntary health agencies as well as from all other sources not elsewhere classified. Also include gifts from individuals that are restricted by the donor to research. Funds from foundations that are affiliated with, or granted solely to your institution, should be included under "Institution funds." Funds for R&D received from a health agency that is a unit of a State or local government should be included under "State and local governments."

How much of your current fund expenditures for separately budgeted research and development in the sciences and engineering (including indirect costs) came from the following sources in FY 2003?

Source of Funds	Line No.	(1) Total (Dollars in thousands)	(2) What Percentage of Federal & Total Funds Are Basic Research
a. Federal Government	1110	\$ _____	% _____
b. State and local governments	1125		
c. Industry	1150		
d. Institution funds (sum of lines 1161 and 1162)	1160		
(1) Institutionally financed organized research	1161		
(2) Unreimbursed indirect costs and related sponsored research	1162		
e. All other sources	1175		
f. TOTAL (sum of a through e)	1100	\$ _____	% _____

BASIC RESEARCH
Please provide the percentages of Federal and total expenditures that are basic research (not applied research) as defined in column (2).

CONFIDENTIALITY
Information received from individual institutions in lines 1161 and 1162, or estimates for basic research expenditures, will NOT be published or released; only aggregate totals will appear in tabulations.
